## NARRATIVE

### A Mission That Changes You

You are programmed to *fix* a broken planet. But the UI is wrong. The ecosystem doesn't want to be controlled. It must be *understood*. Solving the mystery of the planet means connecting with ancestor robots, exploring dynamic weather systems, and imitating wildlife. Usual borders between weather, plant, and animal dissolve. *What counts as life?*

## CORE LOOP

- **EXPLORE**  
Fly between biomes with changing weather and day-night cycles. Discover remnants of past robot generations.
- **COMMUNICATE**  
3 sounds: aggressive shouts, neutral pings, inviting whispers. Each ripples through ecosystems.
- **REPEAT**  
Knowledge-gated progression. Discovered clues / areas revealed via a physical mind map. Progress nonlinearly until you solve the planet's mystery (and your own).

## GAME FEEL

## PRODUCTION SIZE

- Director** (May '24 – May '27)
- Project Manager** (Nov/Dec '26 – April/May '27)
- Concept Artist** (Nov/Dec '26 – March/April '27)
- Technical, 3D Artist, Animator** (Jan – May '27)
- Audio** (Feb – May '27)
- Narrative, Storyboard, Editor, Marketing** (TBD)

Funding received: **BPM** · **Mass Cultural Council**

## CREATOR

### Connor Wall

TECHNICAL ARTIST · SOLO DEVELOPER · ORGANIZER

Studied public health & env. science at *Johns Hopkins*, researched at *Harvard Medical School*, shipped 3 indie games through *Denmark's DADIU* program. Currently building telescope control systems for SpaceX/NASA launches at *Skyslow* (part-time).
